

Document Collector - Don't spend time searching through Infocentre and emails!

Be sure to have the latest information available and save precious time updating your roaming database. The Document Collector automatically imports roaming partner documents and frees you of cumbersome searches through emails and GSMA Infocentre.

Your database is constantly out of date and you often spend time searching for specific roaming partner documents? Document Collector is the right solution for you. It automates the import of roaming partner documents from the GSMA Infocentre and a defined email account into ROAMSYS RMS. This way you can easily import and store a great number of documents, save a lot of time and will always have the latest information available for queries and reports. In addition you will have all the documents in one central place that can be easily accessed by your co-workers, even if they are located in different locations.

ROAMSYS Document Collector at a Glance

- Automates AA.14 downloads from GSMA Infocentre and email
- Supports IR.21, Launch Letters and other agreement documents
- Ensures your database is always up-to-date
- Receive updates of your IR partners' RAEX AA.14s automatically
- Easily installed, needs to be set up only once
- Fully supports the GSMA RAEX standard

The Document Collector is available as a fully integrated add-on with ROAMSYS RMS and RMSgroup.
