

Report Manager - Your Roaming Intelligence Solution

Analyze your roaming data and create valuable reports to enable strategic decisions regarding your roaming business. With the Report Manager its a child's play and you ensure that your decisions are based on the latest and most accurate data.

Whether you are looking for information on pricing, available roaming services or contacts, ROAMSYS Report Manager provides you exactly with what you need. It allows you to run queries through your roaming partners RAEX AA.14 documents and creates exportable reports at the push of a button. It will even convert the different currencies used in your partner documents to the currency of your choice in order to make price comparisons so much easier. As a special feature, a RAEX tool is also included.

ROAMSYS Report Manager at a Glance

Intelligent Reporting Engine

- Create and export reports as PDF, CSV and XML
- Search IOT, contacts and services at the push of a button
- Easily filter your queries for specific information or roaming partners
